

Final Project: Web Programming Project Evaluation			
Student Information			
Name:			
Roll#:			
Section:			
Evaluation Rules: Assign yourself full marks if you claim a complete implementation of the given Criterion. Assign yourself zero marks if you have missed the implementation of the given Criterion.			

Sr#	Self Evaluation Sheet	Obtained Marks	Total Marks
-----	-----------------------	----------------	-------------

	Functionality		
1	All core features implemented correctly (forms, buttons, interactive elements respond without errors)		10
2	Login and Signup system working end-to-end (registration, authentication, session start)		10
3	Data processing functional (database CRUD or API integration working correctly)		5

	Password Encryption & Security		
4	Passwords hashed using a secure algorithm (e.g., bcrypt or Argon2) before storing in database		8
5	Plain-text passwords never stored or logged anywhere in the system		5
6	Password comparison done securely using hash-comparison functions (not string equality)		4
7	Password reset flow implemented securely (token-based, time-limited link)		3

	Role-Based Access Control (Admin & User)		
8	At least two distinct roles defined: Admin and Regular User, stored in database		5
9	Admin dashboard accessible only to admin role; regular users redirected or shown 403 if they attempt access		8
10	Admin can manage users: view user list, activate/deactivate accounts, change roles		7
11	Frontend navigation dynamically changes based on logged-in user role (admin sees extra menu items / controls)		5
12	Backend routes protected with middleware/guard that checks role before processing request		5

	Form Validation		
13	Client-side validation: required fields, email format, password strength enforced in browser		5
14	Server-side validation: inputs sanitized and validated before processing		5
15	Clear, inline error messages displayed to user for invalid or missing inputs		5

	Navigation & Structure		
16	Working navbar on every page; all links accessible with no broken routes		5
17	Logical page hierarchy (Home, About, Contact, etc.) with smooth user flow between pages		3

18	Sticky/responsive navbar, dropdown menus, breadcrumbs, or site search		2
UI / UX Design			
19	Clean, consistent layout — uniform colors, fonts, and spacing throughout		5
20	Responsive design: layout adapts correctly on desktop, tablet, and mobile screens		5
Authentication & Session Management			
21	Functional login/logout with correct session handling and cookie use (e.g., remember-me)		10
22	Session expires after inactivity; re-login required for sensitive actions		5
Git Version Control			
23	Repository initialized and hosted on GitHub/GitLab with proper project structure		3
24	Minimum 10 meaningful commits reflecting incremental development progress		4
25	Clear commit messages following a consistent naming convention (e.g., feat:, fix:, docs:)		3
Footer & Layout Components			
26	Footer present on all pages with contact info, social links, and copyright notice		5
Content & Creativity			
27	Original, relevant, and well-written content across all pages		5
28	Effective use of images, icons, illustrations, or multimedia that enhance the design		5
29	Unique or innovative project concept — goes beyond a generic template or tutorial		5
30	Visual design quality: color palette, typography, whitespace, and overall aesthetic polish		5
31	Animations, transitions, or micro-interactions used tastefully to enhance UX		5
32	Overall creative impression: layout creativity, theme consistency, and user delight factor		5
Performance & Optimization			
33	Pages load quickly; images and assets optimized; minimal unnecessary scripts or stylesheets		5
Documentation & Presentation			
34	README or project report included with clear explanation of features and setup steps		3
35	Live demo or recorded walkthrough provided during presentation		2
Marks Deduction			
36	Plagiarism Deduction (will result in F Grade)		-200%
Marks – 180
